AI in the Human Resources and Benefits Space can improve efficiency, but most companies do not have the proper security protocols in place for their staffs that are using AI. This webinar features AI experts in Use and Security, and will share Best Practices for HR, Benefits, Administrative and IT staffs when using Artificial Intelligence. We will discuss how it's being used, where it can benefit companies most, and the types of security policies and procedures and training you need before deploying AI tools in the workplace.
